The Art of Pool Cleaning Technology

Dolphin Dynamic Pro X

Ultra-Tough Durability for Demanding Professional Pool Cleaning

[The Most Advanced User Friendly Remote Control with Unique Cleaning Programs](#)

- Automatic robotic cleaning solution designed for especially for high-usage public pools up to 25 meters in length.
- Reinforced components for continuous reliability in challenging pool environments.
- Intelligent optimized pool coverage ensures constant conformance to regulatory hygiene standards.
- The industry's best cost performance machine for midsize commercial pools.

[Swivel: Maytronics Patent Unique Cable Free Mechanism](#)

Option to choose between:

- Automatic cleaning (self programming).
- Operation and cleaning programs controlled through a user friendly remote control:
 - **Regular** – floor and walls cleaning program
 - **Ultra clean** – slower movement for special cleaning
 - **Water line** – for special attention to walls and water line
 - **Laps pool** – suitable for this specific type of pool – narrow and long
 - **Climbing** – this option controls the frequency of wall climbing eg: at which frequency the Dolphin should climb on the walls – none, 8, 16, 24 min.
 - **Cycle time** – choose the most suitable cycle time – 4-8 hours
 - **Pool length** – program the pool length – 15m. (50 ft.), 20m. (65 ft.), 25m. (80 ft.), 30m. (100 ft.)

[Power Supply with Cutting Edge Technology of Clogged Filter Bag Indication](#)

Dolphin Caddy: Ideal for handling and storage

Technical specifications

Suction rate (self-controlled) 79 gal/min 18,000 l/hr

Filter bag

Porosity: 50 micron - TUV inspected - 90% efficiency

Motor unit

Voltage 25 VDC 25 VDC

Power supply

Input 115 VAC / 100 VAC / 230 VAC

Output 30 VDC

Rated output 115 VAC-250W 230 VAC-150W

Splash-proof IP 54

Dimensions

Unit weight (w/o cable) 24 lb. 11 kg.
